

WEATHERPROOF ENCLOSURE

Weatherproof Enclosure with DC mini circuit breaker inside is vitally important party of any solar installation. With capacities of load isolation and overload/ short circuit protection, is designed for PV, energy storage and other DC applications, mainly placed between batteries and hybrid inverters. This enclosure meets all the required standards and has been classed as IP66. With DIN rail circuit breakers completed with a spring loaded lockable lid inside. It is applicable for special waterproof, dust-proof and corrosion-proof locations with top and bottom cable entry.

ADVANTAGES

- 100% PC Enclosure in Series
- Flame Retardant PC Enclosure
- All True DC Components for PV Protection
- Customized and AC Optional
- 5 Years Warranty

Technical Data

DC MCB	Up to 1000Vdc and 80Adc
Enclosure Material	100% poly-carbonate, Anti-UV protection
Installation	Out-door and In-door IP66
Enclosure Size	107×212×92(mm)
